JWZ WINS COVETED SPOTLIGHT AWARD

Las Vegas, NV – JW Zunino Landscape Architecture is so proud to have won a coveted Spotlight Award for the Southwest Gas Outdoor Living Demonstration Area at the NAIOP Awards Banquet held on March 13th at the M Resort.

The primary design goal for this project for was to create a space where new and creative uses for this utility could be displayed for the public to see. Southwest Gas wanted its customers to be able to experience the numerous applications first-hand, in order to fully appreciate the beauty and warmth that the many different varieties of decorative features could bring to their outdoor environments. From equipment for various forms of cooking, to water and fire features, the public would have the opportunity to see how some of these trendsetting amenities might look and feel when fully constructed.

The Outdoor Living Area serves as an extension to the Demonstration Kitchen area that is located inside of the main building just off the Outdoor project. In addition to a lush plant palette, the space utilizes a variety of wall treatments and hardscape materials to provide and highlight the individualized niche areas. A tensile fabric shade structure, in custom SWG colors, was installed for group gatherings. A state-of-the-art, air-conditioned gas barbeque island, which serves as an extension to the indoor demonstration kitchen is included. Several gas fireplaces and firepits along with a dramatic water wall/fire feature were incorporated into the space to provide guests with a variety of different experiences and ideas for their own home environments.
